SECURITY

Protect your business from evolving threats with our expert cybersecurity services. We specialize in:

- Threat detection to identify and mitigate risks before they impact your operations.
- Security monitoring to provide continuous protection of your systems and data
- Vulnerability assessments to identify and address potential weaknesses in your infrastructure

Our cybersecurity solutions are designed to safeguard your business, delivering proactive, reliable, and robust protection so you can focus on what matters most.

GREYDATA

COMPLIANCE

Ensure your business meets industry standards and regulatory requirements with our comprehensive compliance services. We specialize in:

- Adherence to data privacy regulations, including GDPR, PIPEDA, HIPAA, and more, to protect sensitive information and maintain industry standards.
- Safeguarding personal and sensitive data through robust security measures to align with global compliance requirements.
- Ongoing risk assessments and audits to ensure your business stays compliant with evolving regulatory landscapes.

Our compliance services are designed to help you navigate complex regulatory environments, reducing risk and ensuring your business operates with the highest level of security and integrity.

WEB APPS

Unlock the full potential of your online presence with high-performing, scalable web applications. Our team specializes in:

- **ReactJS, AngularJS, and NextJS** for building responsive, dynamic user interfaces
- **NodeJS** for robust, secure backend development and seamless API integration

Whether you need a single-page application, an interactive platform, or an e-commerce solution, we tailor our approach to suit your business needs.

MOBILE APPS

Take your product mobile with seamless, responsive apps designed to engage users on the go. We provide:

- **React Native** and **Expo** solutions for fast, cost-effective cross-platform mobile applications
- Custom integrations for **iOS** and **Android**, bringing your mobile vision to life with consistency and quality

From ideation to launch, we ensure a smooth user experience and an app that reflects your brand.

DESIGN

Design, prototype, and brand your digital presence with our comprehensive design services. We offer:

- A/B testing to optimize your user interface and enhance user engagement
- Interactive prototypes tailored for impactful presentations and stakeholder alignment
- Digital branding strategies to establish and elevate your online identity, including a detailed design handbook

Our design solutions are crafted to resonate with your audience, ensuring creativity, consistency, and a seamless user experience.

INFRA

Deploy, manage, and scale your applications with our AWS-based infrastructure services. We cover:

- **AWS** setup and management for scalable, cost-efficient, and secure cloud solutions
- Hosting and domain management, including **Amazon Route 53** for DNS and domain routing
- Expertise in configuring and optimizing serverless architectures (**AWS Lambda**), databases (**Amazon RDS**), and CI/CD pipelines

Our infrastructure solutions are designed to grow with your business, ensuring reliability, security, and a smooth operational experience.

PROJECT MANAGEMENT

To ensure that scope, timeline, and costs are aligned with your goals, we offer comprehensive Software Project Management services. Our experienced technical project manager will oversee each phase, maintaining clear communication, risk management, and budget alignment.

We're happy to work with existing resources on your team or leverage our experienced in-house team. This flexibility allows us to seamlessly integrate with your current workflow and optimize resource allocation based on project needs.

We're also open to exploring new technologies to meet your needs.

GREYDATA

GREYDATA FRAMEWORK

Discovery

Gather detailed insights into the client's needs, goals, and current challenges. This stage includes initial meetings, assessments, and analysis of existing systems and processes.

Strategize

Develop a tailored strategy based on the discoveries. Define objectives, prioritize goals, and outline initial recommendations.

Plan

Turn strategies into actionable steps, create timelines, allocate resources, and set up a clear structure for execution. Ensure contingency plans for risk management are included here.

Execute

Implement the plan while monitoring, managing, and optimizing at every stage to meet key performance indicators and client goals.
